## Product Overview

Conduct-O-Fil<sup>®</sup> additives are high quality conductive fillers for polymers which impart long-lasting electrical performance in a variety of applications. Our products are known for their high quality, unique properties, and availability in both small and large volume.

### Typical Applications

- Elastomers—EMI shielding
- Adhesives—Electronics assembly
- Coatings—EMI shielding

- Silver-coated glass spheres
- Silver-coated glass fibers
- Silver-coated glass flakes
- Silver-coated glass granules
- Silver-coated aluminum particles
- Silver-coated nickel particles
- Silver-coated copper spheres
- Silver-coated copper granules
- Silver-coated copper flakes
- Silver-coated copper dendrites
- Silver-coated hollow glass spheres
- Silver-coated hollow ceramic spheres
- Silver-coated magnetic particles
- Silver-coated sub-10 micron particles
- In addition, any of the silver-coated products are also available with a gold coating.
- Nickel-coated graphite
- Nickel-coated aluminum
